

A full-process engineer and team-centered developer, ready to join a project at any stage of its lifecycle. Passionate about engineering the developer experience. Available Summer 2026. Adept at:

- Self-starter skills and cross-functional communication in fast-paced environments
- Automated backend and frontend integration testing with classic and modern tools
- Optimizing the web developer experience with IDE optimization
- Responsible AI usage to accelerate mundane tasks while keeping high quality results

Education

B.S. Software Engineering - Rochester Institute of Technology, Rochester, NY

June 2027

- Dean's List - Fall 2025

Relevant Experience

Software Engineer - SCOOP, RIT, Rochester, NY

January 2026 - Present

Standardizing internal web applications by building reusable frontend components and API integrations.

- Implemented Proof-of-concept frontend test suites with React Testing Library and Cypress
- Cleaning up vite-coded codebase to reduce project's lines of code by a predicted 40+%
- Designing universal workflow API integration for robust user flows across several projects

Tools: Agile, Javascript (Prisma, React Bootstrap), MariaDB (Adminer), Cypress

Software Engineer - ITS Dev Team, RIT, Rochester, NY

May 2025 - January 2026

Employees' workflows relied on a dated PHP web app. Our team released its successor ahead of schedule.

- Designed foundations for all-new backend integration testing suite
- Introduced typing to untyped python backend, reducing type errors by 50%
- Took on role of solution lead post-release, acting as SME for new teammates

Tools: Gitlab, CI/CD, TypeScript (Mantine, Tanstack Query), Python (SQLAlchemy, Flask, Pytest), Linux

Software Developer - Northwoods Software, Nashua, NH

May - August 2023, June - August 2024

In a self-guided environment, carried upgrades to flagship products' systems from identification to release.

- Integrated modern OKLCH color space to create accessible color palette generation
- Alleviated diagram loading bottleneck by optimizing color conversion by 99.7%

Tools: Github, TypeScript, JavaScript, HTML, CSS, GoJS, ChartJS, npm, Git

Projects

Scrapstack

September - December 2025

Media platform to search posts from feeds constructed from users' liked posts from Twitter.

- Collaborated with peer to create a long-running web scraper
- Streamlined the user experience with no-login authentication

Tools: Cloudflare Workers, Terraform, AWS Lambda, CF Wrangler, MongoDB Atlas, Tanstack Query

Developer Portfolio (scotthappy.com)

March - August 2025

- Optimized physics-based scroll wheel with direct DOM manipulation to achieve high performance

Tools: Figma, AWS Amplify, AWS Route 53, DNS, SSL, React, Tailwind, Typescript, CSS, REST APIs

Professional/Leadership Experience

Technical Support Representative - ITS Service Desk, RIT, NY

Seasonally, September - May, 2023 - 2025

- Resolved 250+ tier-2 tickets, resulting in above-average survey metrics for communication and speed

Eagle Scout - Scouts BSA, NH

2016 - August 2023

- Benefited thousands of hikers by leading 10+ people over 154 hours to build hiking trail stairs
- Nominated for and participated in national leadership program focused on teambuilding
